

Technical Bulletin

TRACcess 3.0

February 2007

Attention GE Security TRACcess 3.0 customers:

As you might already know, beginning this year, Daylight Saving Time (DST) in the United States and Canada, will start three weeks earlier (March 11, 2007) and end one week later (November 4, 2007) than in the past.

We wanted to take this opportunity to inform you that our TRACcess websites and computer systems that serve you have all been updated with the appropriate Microsoft patches and internal GE Security patches for this event.

As a suggestion, you might want to look at the Microsoft website to adjust the Microsoft Windows clock settings for your own personal computer. If so, you can click on the following link: http://support.microsoft.com/gp/cp_dst and be directed to Microsoft's Daylight Saving Time help and support center.

Thank you,

GE Security
