

RISCO adds online showing information, Call-Before-Showing (CBS), and a several new features to the real estate industry's most economical, reliable, and easy-to-use lockbox system.

RISCO ReaderKEY2 automatically brings critical showing information directly to you! Access information you need to stay on top of your business anywhere an active Internet connection is available.

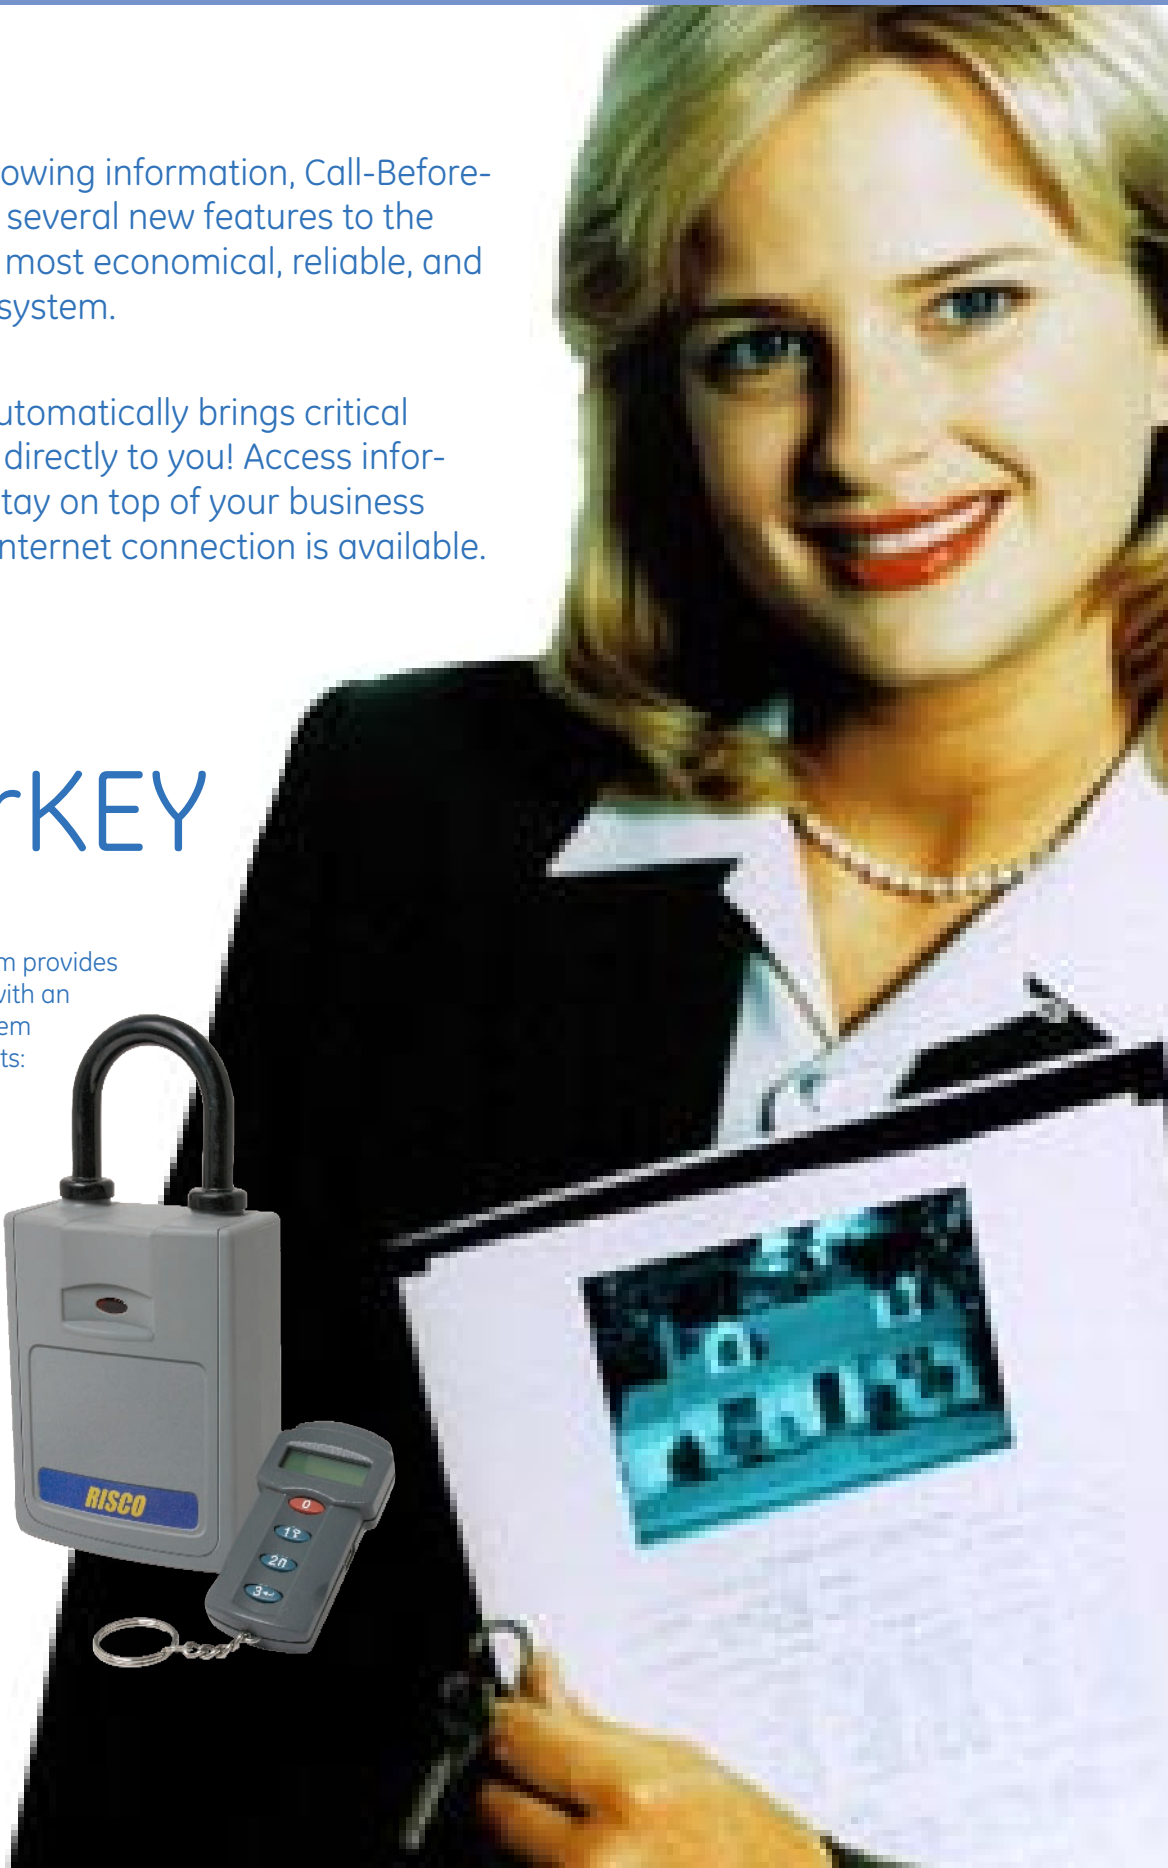

# RISCO ReaderKEY

The RISCO ReaderKEY2 System provides Association / MLS members with an easy-to-support lockbox system and is comprised of three parts:

- ReaderKEY2
- RediSAFE keybox
- OrionWeb database.

Just these three components make it simple to obtain complete showing information.

With just three buttons on the keypad, operation is as easy as 1-2-3. And no hidden costs!

## Why upgrade to the new RISCO ReaderKEY2 system?

- Online showing information – See showing information online, from your office or from anywhere that has a web connection. No need to visit the lockbox to retrieve showing information.
- Call Before Showing – Activate the optional Call Before Showing (CBS) feature to allow a specific showing agent to view the property at any predetermined day and time.
- View information updates – Retrieve updated showing information without having to visit the lockbox location. Just plug your ReaderKEY2 into your computer with a USB connection to receive new information automatically. Updates are automatic and fast.

## What are the details?

- The ReaderKEY2 is a networked key that stores RediSAFE activity. Showing activity information in ReaderKEY2 is transmitted to RISCO's OrionWeb database each time the key connects to the database and updates. Obtain updated information simply by logging in to your Orion Web account.
- ReaderKEY2 tracks the 48 most recent keytray openings and uploads them to the RISCO System each time that the key connects to the RISCO database. Once the information is uploaded and processed overnight, you can view that information at the RISCO agent website by running a showing report.
- ReaderKEY2 expires on a regular basis and must be updated. This electronic key updates automatically by connecting the ReaderKEY2 to a computer with an open Internet connection
- ReaderKEY2 has a lithium ion battery that recharges whenever the ReaderKEY2 is connected to a computer.
- RISCO client software allows you to read showing activity in both the ReaderKEY2 and the RediSAFE. Both are performed while the ReaderKEY2 is connected to a computer with the client software running.

## What do I gain by upgrading?

Upgrading to Risco ReaderKEY2 brings you extremely useful features:

- Download and read all showing information, without going to Board / Association offices
- On-line showing information means the ability to download all showing information and view it on-screen without having to visit Board / Association office
- Easier to update information. No cradle required
- CBS adds extra security
- Backlit screen makes reading ReaderKEY2 easy, especially after dark

## How do I upgrade?

Upgrading to the new RISCO ReaderKEY system is simple and easy. There is no need to change out keyboxes already hanging on your listings! All you need to do is:

- Attend RISCO ReaderKEY2 training
- Swap your key
- Go show property
