Introduction

This is the *SymDec 16 plus 4 Release Notes* (0105-0347A) for the GE Security *SymDec 16 plus 4 User Manual* (0150-0325C) firmware upgrade release v1.47k. This document includes information on this product that did not make it into the manual. Where information differs between the two documents, this document supersedes the manual.

What's new

Changes to this release of the SymDec 16 plus 4 software include:

- Enhanced hard drive recovery;
- Improved Info menu; and
- Search and motion modifications.

In this addendum:

<i>Introduction</i>	1
<i>New features</i>	2
<i>Enhanced hard drive recovery</i>	2
<i>Info Menu</i>	2
<i>Search and motion improvements</i>	2

New features

Enhanced hard drive recovery

The SymDec 16 plus 4 with two or more hard drives can now continue to boot up even if one of the hard drives has failed.

Info Menu

A *Days Recorded* field has been added to the *Info* menu so that you can quickly see how many days of recorded data that you have.

Search and motion improvements

- Improved *Search by Date/Time* results while performing a *Motion/Alarm/Event* search.
- Improved *Text/Event/Alarm/Motion* searches using FCWnx.
- Performance improvements on continuous motion events.
