

NEW 2- and 4-door system Starter Kits

Facility Commander™ Wnx Starter Kits are available to cost effectively serve the needs of small businesses seeking an entry-level system for access control. With these new kits, organizations can enjoy advanced security management performance and capabilities like integrated photo ID badging and integrated digital video surveillance.

These kits are shipped with everything you need to get started, including Facility Commander Wnx Professional version software, and your choice of controllers and readers. The kits are configured for easy ordering, installation and start-up of new 2- and 4-door systems. Add-on Kits are also available for further easy expansion.

The kits are packaged with GE Transition™ Series readers. The T-500 and T-520 readers support simultaneous multi-vendor credential support of 125Khz Proximity and 13.5Mhz contactless smart cards. All kits allow you to choose from either M2000 or DirecDoor™ PoE controllers, and all kits include a starter supply of 25 Entrée™ Proximity Cards.

Add-on Kits

GE offers a number of prepackaged Add-on Kits to further simplify your configuration. These kits include the hardware necessary to add doors, but do not include the software or credentials. These kits are perfect for adding two or four additional doors at a time.

A future-proof solution you can't outgrow!

Facility Commander Wnx software and hardware are compatible with—and can be migrated to—large-scale access platforms including Facility Commander Wnx, Enterprise or Global Editions, as the organization's needs evolve.

GE designs backwards-compatibility into our products so the latest innovations will work in tandem with established security technologies. Through technological excellence, superior quality and an investment in bold, creative ideas, GE provides products and solutions that make the world a safer place.
